

The different types of Extensions

Fusion, Strand by Strand, or Pre-Tipped Hair– This is a process done strand by strand in small sections. Using heated adhesive sticks and glue gun made for hair extensions, extension hair is added directly to your own hair. Hair can be bought already cut, weft removed and pre tipped with adhesive, a purging tool is used to warm the adhesive and apply it to your hair. Your hair lies over the top for a natural look.

Weaving– This is a process which a corn row or track is created around the head and close to the scalp. Extension hair is sewn on the tracks. Your own hair lays over the tracks for a natural look.

Bonding – A bonding glue is applied onto the weft of the extension hair and then applied at the root of your hair. This is a temporary method.

Clip ins – Clips have been sewn onto human extensions hair. You may clip these in and out yourself. Clips can be purchased from us and sewn on a pound of hair yourself or you may order Beautiful clip in extensions already done.

Mini Links – This method uses no glue, no heat, no remover and also no damage to the hair. Small circular links are used. Your own hair is pulled through in small pieces with a tool that looks like a crochet hook then the pre tipped hair is put inside the link and it is squeezed tight. To remove use pinchers to open the link. Hair can be reused. Weaves can be done with links. Make a row of links and sew extensions hair to the links. You can also use a link in certain spots that may be lifting to hold it down or make it to your next appointment. Links are also used to make a circle and sew down a hairpiece or to hold down wigs. The plus is no glue and no heat and they are very small so they lay really flat and are hard to see.

Tape on and seamless – This is a hot new product. The wefted part of the hair is made from a polyurethane really thin flat strip that is already pre taped with a stick double sided tape. You just pull the backing off and apply the hair. It lasts 1–5 days or we can add the adhesive we sell and it lasts several months. This is a new wave of the movie stars as the hair lies flat to the head no one knows your are wearing them if they touch your head. They are very comfortable to wear.
